

The programme will allow participants to learn and master effective online marketing strategies from knowing how to plan, setting-up, monitoring and optimising it, to achieving marketing goals effectively.

Participants will learn how to incorporate AI and other tools, together with proven framework and formula to manage their Social Media channels and Search Engine marketing campaigns, whether they're in the B2C or B2B industry.

These modules are custom designed to help participants be equipped with the skills and ability to see improvements in their marketing performance, productivity and return on ad spend.

Other than sharing critical components and concepts of digital marketing, the workshop will also cover case studies, best practices, the do's and don'ts – making it practical, easy to understand and easy to apply.

Learning Outcomes

By the end of this program, participants will be able to:

- Understand the principles of digital marketing, the tools, and how you can leverage it to grow your presence, positioning, and revenue both online and offline
- Leverage on the latest social media and Search Marketing campaign strategies and optimization process to improve your marketing results and performance
- Incorporate AI to generate headlines, copies, images, and other marketing enhancement tools to create an effective campaign for both B2C and B2B
- Build authority, brand, and positioning as the go-to-expert on social media
